Name: _____

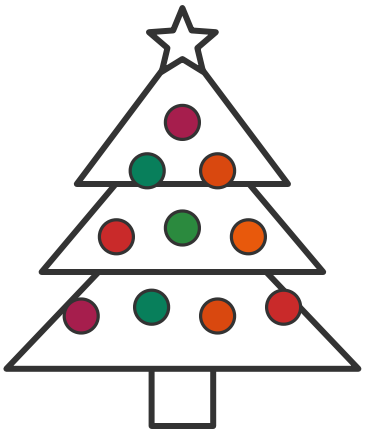

Count the Ornaments

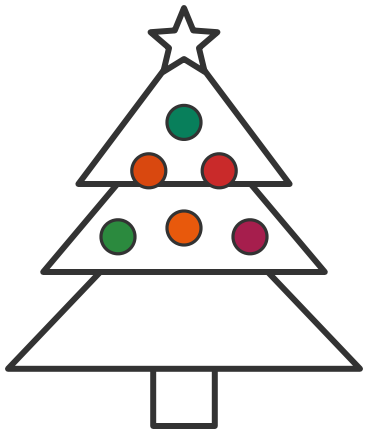

Count the ornaments on each tree. Touch each one as you count. Write the number on the lines.

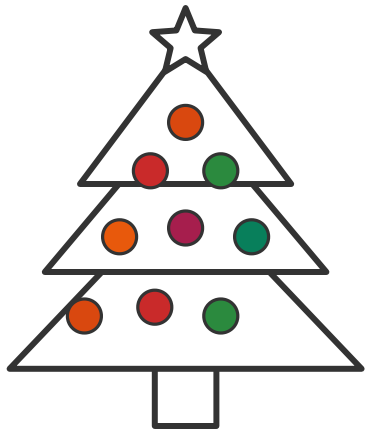

💡 **For grown-ups: why it works.** Touching each ornament once while saying one number is one-to-one counting, the base of all early math. The trees go up to 10, so watch the counts above 5: many children skip or double-count there. Answers: 5, 8, 3, 10, 6, 9.
