 Name: _____

How to Draw a Fish

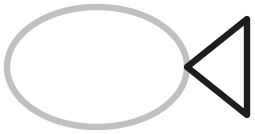

Follow the steps: each picture adds one new part (the dark lines). Then draw your own fish in the big box!

1

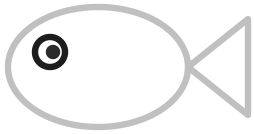

Draw a big oval.

2

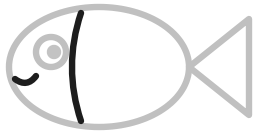

Add a triangle tail.

3

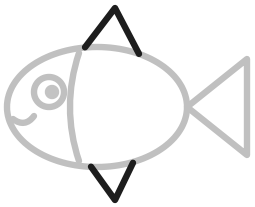

Draw an eye.

4

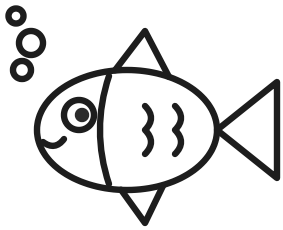

Add a smile and a curved line.

5

Draw two fins.

6

Add scales and bubbles.

Your turn! Draw your fish here.

Then color it in!

💡 **For grown-ups: why it works.** Directed drawing breaks a picture into simple shapes, one step at a time. Children practice looking closely, following directions in order and controlling circles, lines and curves, the same shapes that make letters. Every drawing will look different, and that is the fun part!
