 Name: _____

Dot the Letter I

Dab a dot marker in every circle. Start at the green 1 and follow the letter the way you write it. No markers? Use stickers, paint on a fingertip, or crayon dots.

I is for
ice cream

For grown-ups: why it works. Dot markers build hand strength and hand-eye coordination for little hands. The dots follow the real pencil path of I and i, so dabbing them in order teaches how the letter is written. Say the letter's sound as you go: I says /i/ like ice cream.
