 Name: _____

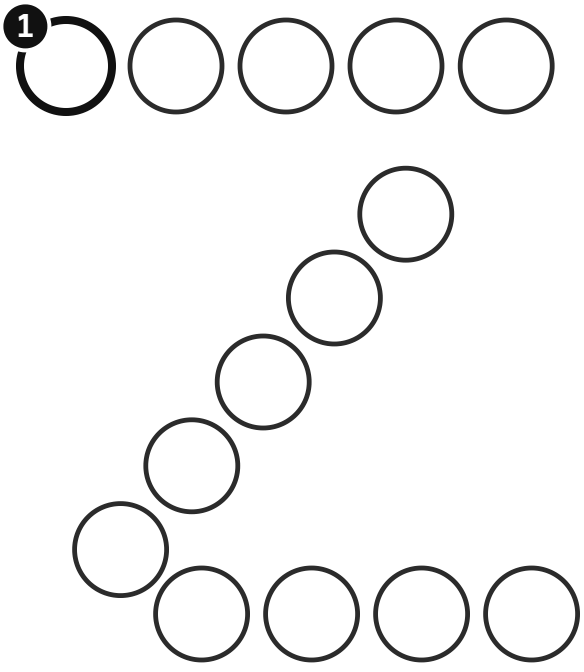

Dot the Letter Z

Dab a dot marker in every circle. Start at the green 1 and follow the letter the way you write it. No markers? Use stickers, paint on a fingertip, or crayon dots.

Z is for
zebra

For grown-ups: why it works. Dot markers build hand strength and hand-eye coordination for little hands. The dots follow the real pencil path of Z and z, so dabbing them in order teaches how the letter is written. Say the letter's sound as you go: Z says /z/ like zebra.
