Name: _____

Hop, Hop, Hop!

Each animal hops to its treat. Trace every hop from the black dot: up, over and down!

💡 **For grown-ups: why it works.** Tracing from left to right, staying on the soft road, trains the eye and hand to work together, the same skill used for writing. Go slowly; finger first, then pencil or crayon. Hops are the over-and-down motion inside n, m, h and r.
