Name: _____

Straight to the Snack!

Help each animal get its snack. Start at the black dot and trace the line all the way across.

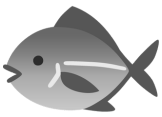

💡 **For grown-ups: why it works.** Tracing from left to right, staying on the soft road, trains the eye and hand to work together, the same skill used for writing. Go slowly; finger first, then pencil or crayon. Straight lines come first: they are the strokes inside L, T, E, H and the numbers 1 and 4.
