Name: _____

⚡ Zigzag Zoom

Up and down, up and down! Trace each zigzag from the green dot. Stop and turn sharp at every point.

💡 **For grown-ups: why it works.** Tracing from left to right, staying on the soft road, trains the eye and hand to work together, the same skill used for writing. Go slowly; finger first, then pencil or crayon. Sharp turns teach the hand to stop and change direction, which is what V, W, M, N, Z and k need.
