 Name: _____

Bunny Surprise: Color by Dot Sums

First color each crayon in the key with any crayon you like. Count all the dots on both dice in each space. Find that number in the key and color the space with its crayon. Tiny spaces with no code: color them any way you like!

Key

3 — light blue

4 — pink

5 — green

6 — yellow

7 — red

9 — orange

💡 **For grown-ups: why it works.** Two dice make adding something a child can see and count. At first they count every dot; soon they start from the bigger die and count on, a key step toward adding in their head. Next step: color by sums.
