Name: _____

Sweet Cupcake: answer

Count all the dots on both dice in each space. Find that number in the key and color the space with its crayon.

Key

- 3 — red
- 4 — purple
- 5 — yellow
- 7 — green
- 8 — light blue
- 10 — pink

💡 **For grown-ups: why it works.** Two dice make adding something a child can see and count. At first they count every dot; soon they start from the bigger die and count on, a key step toward adding in their head. Next step: color by sums.
