Name: _____

Sweet Cupcake: Color by Dot Sums

Count all the dots on both dice in each space. Find that number in the key and color the space with its crayon.

Key

3 — red

4 — purple

5 — yellow

7 — green

8 — light blue

10 — pink

💡 **For grown-ups: why it works.** Two dice make adding something a child can see and count. At first they count every dot; soon they start from the bigger die and count on, a key step toward adding in their head. Next step: color by sums.
