 Name: _____

Puppy Balloon: Color by Number

First color each crayon in the key with any crayon you like. Find the number in each space. Color it with the crayon that has the same number. Count the dots in the key if you need help! Tiny spaces with no code: color them any way you like!

Key

2 — brown

5 — pink

6 — red

7 — yellow

9 — green

10 — light blue

For grown-ups: why it works. The key shows each number and its dots in a ten-frame, so a child who doesn't know 8 yet can count to it. That links the numeral to the amount, the step most color-by-number pages skip. Next step: color by dot sums.
