 Name: _____

Rainbow Unicorn: Color by Sums

First color each crayon in the key with any crayon you like. Solve the sum in each space. Color the space with the crayon that has the answer. Tiny spaces with no code: color them any way you like!

Key

4 — pink

5 — green

6 — purple

7 — yellow

10 — light blue

For grown-ups: why it works. Each answer shows up as several different sums (7 is 4 + 3, 5 + 2 and 6 + 1), so children practise the ways to make each number, not just one fact. The page checks itself: a wrong answer leaves a strange color in the picture, and children love to find and fix it.
