Name: _____

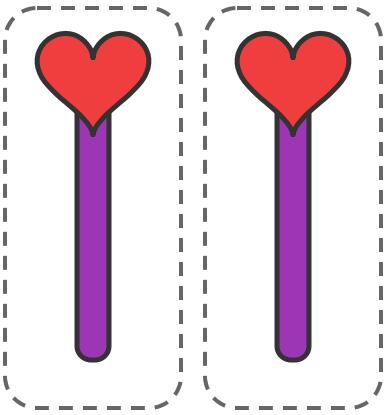

Build a Love Bug

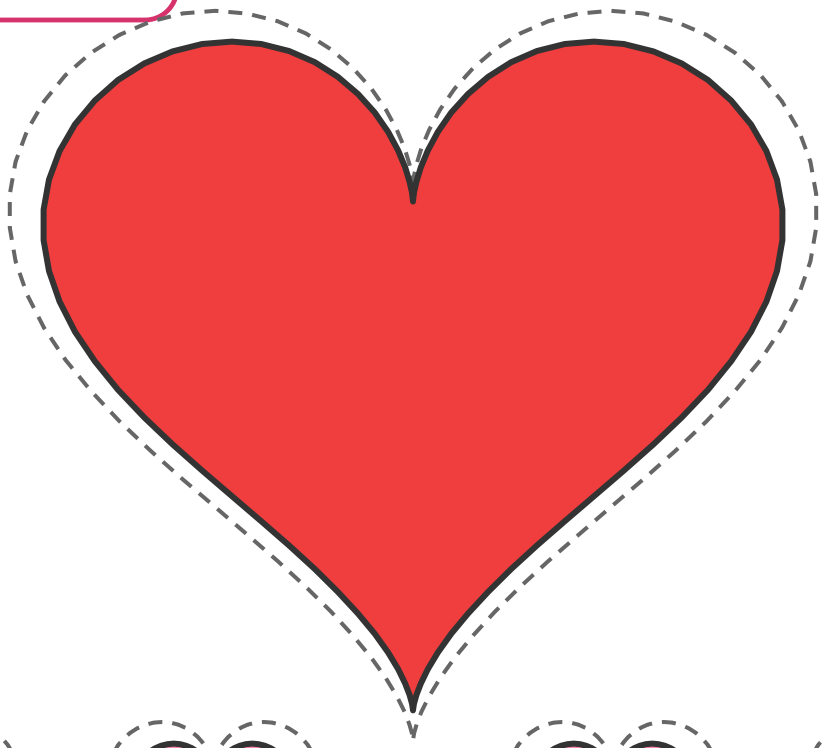

Color the pieces. Cut them out on the dashed lines. Glue the head on top of the big heart, add the antennae and stick the little hearts on its back. Make it look like the bug in the box!

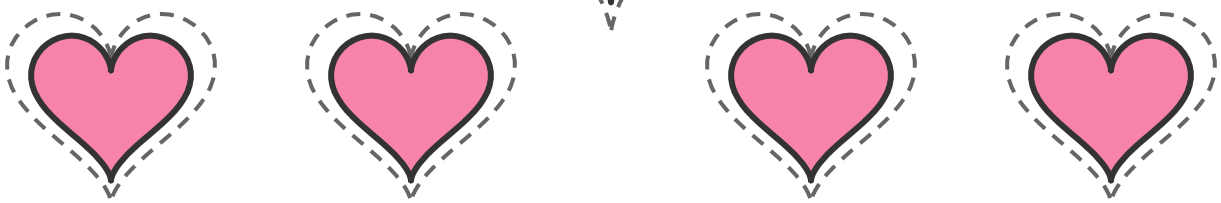

Make me!

💡 **For grown-ups: why it works.** Cutting around big curves and circles builds the hand strength and control children need for writing. Copying the finished bug in the box asks them to look closely, plan the order and place each piece: real spatial thinking. Glue it onto colored paper and add a message for someone special.
