Name: _____

Valentine Treats Graph

Count each treat in the big box. For each one, color one box above its picture, starting at the bottom. Write how many under the picture. Which treat has the most?

Color from the bottom up!

💡 **For grown-ups: why it works.** A picture graph turns counting into something children can see: the tallest column is the most. Ask "how many more teddies than lollipops?" to compare. Answers: cupcakes 5, lollipops 3, teddies 6, roses 4.
