 Name: _____

Dot-to-Dot Surprise: 1 to 20

Start at the black dot. Connect the dots in order from 1 to 20, then back to 1. What did you make? Draw a pattern on it and color it!

💡 **For grown-ups: why it works.** Dot-to-dot practices the counting order past 10 (11, 12, 13…) and finding the next number among many. The lines go in every direction, including the curves of the thumb, which are the same moves found inside letters.
