Name: _____

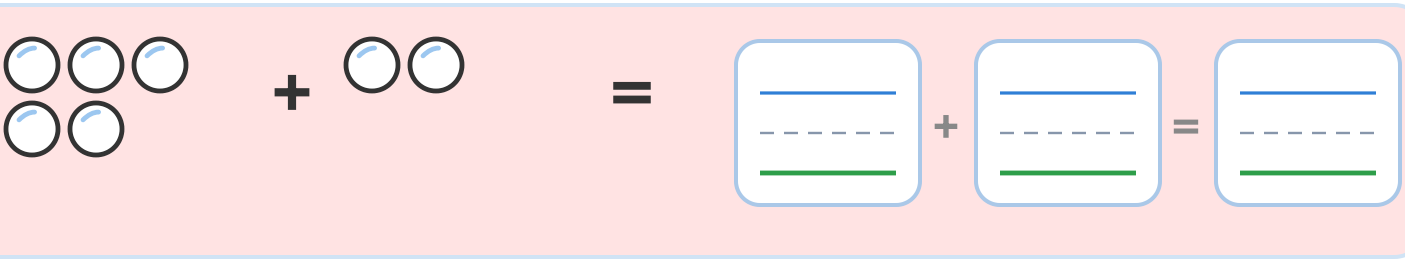

Snowball Adding

Count the snowballs in each pile. Write the two numbers, then count them all together and write how many in all.

💡 **For grown-ups: why it works.** Writing the number under each pile before adding turns pictures into a number sentence (2 + 3 = 5), moving from pictures to numbers one small step at a time. Encourage counting on: say the first pile's number, then keep counting the second pile. Answers: 5, 5, 6, 7, 8.
