 Name: _____

Winter Animal Shadows

Look at the shape of each animal. Draw a line from the black dot to the dot beside its shadow.

💡 **For grown-ups: why it works.** A shadow has no colors or details, so children must use outline and shape alone: the penguin's wings, the bear's round ears, the owl's tufts. This careful looking is the same skill used to tell apart letters that look alike, like b and d.
